

Homelink Policy and Procedures Priority Pool Procedure

Drafted 7/3/2020

PURPOSE: The priority pool is designed to minimize the amount of time a household needs to wait for a referral to a program while also ensuring that the highest need households are prioritized for available housing assistance. The priority pool will ensure that people in emergency shelter and living unsheltered have access to permanent housing. SARA will generate the Priority Pool list weekly and share with shelters, outreach workers, and housing providers so they may proactively engage with people prioritized for upcoming permanent housing openings.

PROCEDURES:

Developing the Priority Pool Size:

- Based on this FY's data, an average of 35 referrals are made monthly ([Table A](#)).
- The Priority Pool will consist of 60 people¹.

Definitions:

- Emergency Shelter (ES): Includes all ES projects in HMIS and Domestic Violence ES.
- Street Outreach (SO): Includes courtyard and unsheltered population enrolled in SO projects.

Composition:

1. The clients identified as the most vulnerable per community prioritization policy in each project type will be added to the Priority Pool at the indicated rate. The percentages are based on this FY's monthly Homelink referral by project ([Table B](#)).
- RRH – 56% (28)
 - PSH – 24% (12)
 - TH – 14% (7)
 - OPH – 6% (3)

¹ 10 of the list will be comprised of Youth who are awaiting housing referrals to new YHDP projects.

Homelink Policy and Procedures Priority Pool Procedure

Drafted 7/3/2020

2. Of the identified people on the Priority Pool, 75% will be attached to an emergency shelter, and 25% will be involved in street outreach. Based on current waitlist percentages ([Table C](#)).
3. The Priority Pool will be configured in the following way based on FYTD trends ([Table D](#) & [Chart A](#))².
 - Individuals – 62% (37)
 - Families – 38% (23)

Using and Maintaining the Priority Pool

1. Once the initial Priority Pool is developed using the process outlined above, the Priority Pool will be sent to all current outreach, shelter case managers and referring partners.
 2. Referring partners will complete Notification of Availability google form (See request/referral process).
 3. When possible, SARA will always refer clients from the Priority Pool that (a) matches the project type requested and (b) is receiving services currently with the referring agency if applicable (i.e. SAMA is requesting 2 clients for a RRH opening, there is 1 RRH client in the Priority Pool receiving SAMA outreach services, then that client would be matched to SAMA RRH opening).
 - See Table E, Chart [B](#) & [C](#) for current Homelink waitlist census by agency³
 4. After the referral has been made and the client has been added to the requesting agency's claims summary, the client will be removed from the Priority Pool.
- A new client matching the recommended project and housing status of the recently referred client will be added to the Priority Pool to maintain the pool composition.
 - New Priority Pool reports will be sent each Friday to case managers/outreach workers and Housing Provider POCs.

² These percentages have been adjusted to include anticipated youth referral trends, which were not previously captured.

³ These are by agency and not individual agency projects.
